NAM CYBER COVER

Cyber insurance and risk mitigation for manufacturers

> **ONE break in the supply chain can shut down your business.**

> **ONE decision can help protect your people and save your business.**

If even one point in your supply chain has a weak cybersecurity posture, your entire business and reputation could suffer irreversible consequences of an attack. You can't afford to take that risk.

NAM Cyber Cover is an exclusive program from the National Association of Manufacturers that combines cyber insurance with proactive defense measures. It is powered by a leading cyber insurance provider, Coalition, and a nationally recognized broker, AHT Insurance.

Because NAM Cyber Cover was designed by manufacturers, it includes coverages and enhancements that meet the unique needs of manufacturing companies. See how it compares to insurance from other providers.
