

State COVID-Operation Snapshot for Florida

Statewide Mask Order: No.

Florida recommends but does not require face coverings for the general public. Several cities and large counties, including Miami-Dade, Palm Beach and Hillsborough (which includes Tampa), have mask requirements.

Statewide Travel Restrictions: Yes.

Travelers and residents arriving from New York, New Jersey, and Connecticut are required to self-quarantine for 14 days upon arrival, or the duration of their trip, whichever is shorter.

Current Executive Order Status: Safe. Smart. Step-by-Step. Phase 2.

June 5, Florida entered Phase 2 of “Safe. Smart. Step-by-Step” plan with a reopened economy. The order continues to permit essential businesses under the federal CISA definitions of critical infrastructure and allows the partial reopening of nonessential retail or in-person businesses at a reduced capacity.

Under the most recent order, local municipalities may implement their own stay at home order as they deem appropriate for their communities but shall follow the critical infrastructure workforce guidance.
