

State COVID-Operation Snapshot for Indiana

Statewide Mask Order: Yes.

Gov. Eric Holcomb's order requiring Hoosiers age 8 and up to mask themselves in most public settings took effect July 27 and will run through at least Aug. 26. It also sets detailed mask requirements for reopening schools, with students in grades 3-12 and all adults required to cover their faces when on school property, until further notice.

Statewide Travel Restrictions: No.

Current Executive Order Status: Indiana's Back on Track Stage 4.5

Manufacturing was permitted starting in Phase 2 and "Guidelines for Manufacturing" were provided with health and safety protocols regarding social distancing, employee checks and overall safety.

Indiana previously imposed a stay at home order on March 28 and adopted the federal CISA guidelines for essential business in the state.

The Indiana Economic Development Corporation is now offering a Critical Industries Hotline to field industry questions. Call (877) 820-0890 or email covidresponse@iedc.in.gov with questions.

Businesses that remain operational are to practice social distancing and function at minimum basic operations and encourage telework where possible.
