Counsel for Proposed Defendant-Intervenors
National Association of Manufacturers, et al.
*(Complete List of Parties Represented Listed on
Signature Page)*

IN THE UNITED STATES DISTRICT COURT
FOR THE NORTHERN DISTRICT OF CALIFORNIA
OAKLAND DIVISION

SIERRA CLUB, AMERICAN LUNG
ASSOCIATION, ENVIRONMENTAL
DEFENSE FUND, and NATURAL
RESOURCES DEFENSE COUNCIL

Plaintiffs,

v.

UNITED STATES ENVIRONMENTAL
PROTECTION AGENCY; GINA
McCARTHY, in her official capacity as
Administrator of the United States
Environmental Protection Agency,

Defendants.

Case No. 4:13-cv-02809-YGR

**REPLY IN SUPPORT OF MOTION FOR
LEAVE TO INTERVENE AS DEFENDANTS BY
PROPOSED DEFENDANT-INTERVENORS
NATIONAL ASSOCIATION OF
MANUFACTURERS, ET AL.**

Date: October 15, 2013
Time: 2:00 PM
Place: Courtroom 5, Second Floor
Judge: Hon. Yvonne Gonzalez Rogers

NAAQS	National Ambient Air Quality Standards
PA	Policy Assessment
REA	Risk and Exposure Assessment

ARGUMENT

I. This Suit Threatens to Impair Proposed Defendant-Intervenors’ Economic Interests in Any Final Standard Resulting From EPA’s Review.

Plaintiffs’ complaint lays out the broad scope of this lawsuit in no uncertain terms, declaring that “[t]his is an action to compel the Administrator of the EPA to fulfill [her] non-discretionary duty to review and *adopt* overdue national ambient air quality standards for ozone pollution.” Compl. ¶ 6 (emphasis added). Plaintiffs also allege that the existing ozone national ambient air quality standards (“NAAQS”) are “inadequate to protect public health and welfare,” a claim that, if established as true, could support revision of the NAAQS. *Id.* ¶ 33. Moreover, even in Plaintiffs’ Opposition to Proposed Defendant-Intervenors’ Motion to Intervene (“Plaintiffs’ Response” or “Pls.’ Resp.”), which largely disavows the Complaint’s claims regarding the substantive adequacy of the existing ozone NAAQS, Plaintiffs still do not completely abandon their request that this Court order the U.S. Environmental Protection Agency (“EPA” or “the Agency”) to revise the NAAQS, stating that “[h]ere, the only issue in dispute is whether EPA is in breach of its mandatory duty to *promulgate ozone air quality standards* according to the statutory timetable.” Pls.’ Resp. at 4 (emphasis added). These statements collectively indicate that Plaintiffs envision that this lawsuit will lead to Court-ordered substantive rulemaking proceedings that they believe will result in new, more stringent ozone NAAQS, which would harm Proposed Defendant-Intervenors’ economic interests.

Despite the language from the Complaint cited above, Plaintiffs’ Response generally walks away from Plaintiffs’ earlier claims regarding the adequacy of the existing ozone NAAQS. *See, e.g.*, Pls.’ Resp. at 1 (“Plaintiffs do not, and cannot, ask for the imposition of particular ozone air quality standards.”); *id.* at 3 (Plaintiffs “acknowledge that the content of [the NAAQS] are not the subject of this lawsuit”); *id.* at 8 (“[T]his lawsuit concerns whether EPA has failed to perform a mandatory duty to review the ozone air quality standards, and whether a firm rulemaking deadline should be ordered. It does not address the content of those particular standards.”). Proposed Defendant-Intervenors agree with Plaintiffs that the Complaint’s claims that go beyond EPA’s duty to review the existing NAAQS are not properly before this Court,

1 since “only the D.C. Circuit Court of Appeals has jurisdiction over such questions” as “the
 2 adequacy of the current ozone air quality standards, the need for new standards, and the
 3 substantive content of those standards.” *Id.* at 12 (citing Clean Air Act (“CAA”) § 307(b)(1), 42
 4 U.S.C. § 7607(b)(1) (2013)). Accordingly, all of the parties and Proposed Defendant-Intervenors
 5 agree that any final remedial order from this Court should only address the timetable for EPA’s
 6 review of the existing ozone NAAQS and may not set deadlines for EPA’s promulgation of any
 7 revised standards that the Administrator may deem appropriate.

8 Nevertheless, because this suit encompasses claims to compel rulemaking on the need for
 9 new NAAQS, Proposed Defendant-Intervenors’ economic interests may be impaired by the
 10 resolution of Plaintiffs’ claims. Although EPA cites a Second Circuit decision, *American Lung*
 11 *Association v. Reilly*, 962 F.2d 258 (2d Cir. 1992), *aff’ing* 141 F.R.D. 19 (E.D.N.Y. 1992), to
 12 assert that Proposed Defendant-Intervenors should be denied intervention as of right, that case
 13 does not control here. As an initial matter, the Second Circuit’s decision is not binding on this
 14 Court, and the Ninth Circuit has not yet addressed regulated entities’ right to intervene in a
 15 lawsuit to compel rulemaking on review of a NAAQS.

16 On the merits, *American Lung Association* was wrong in asserting that the regulated
 17 community’s interest in any subsequent NAAQS rulemaking was “purely contingent and
 18 speculative.” 141 F.R.D. at 22. Because the outcome of any court-ordered rulemaking in this
 19 case could be more stringent standards, Proposed Defendant-Intervenors’ interests are directly
 20 impacted by the resolution of this case. These interests are no more speculative than the asserted
 21 effects of EPA’s inaction on Plaintiffs’ “health, recreational, aesthetic, and environmental
 22 interests,” which Plaintiffs cite to support their standing and which are based upon the “double
 23 contingency” that (1) EPA’s review of the ozone NAAQS is overdue and (2) that review will
 24 find that the current NAAQS are inadequate.¹ See Compl. ¶ 16. In light of the regulated
 25 community’s substantial interest in the NAAQS, courts have long recognized that industry
 26

27 ¹ Accordingly, to the extent that Proposed Defendant-Intervenors’ interests in the
 28 NAAQS review rulemaking are too speculative to support intervention, Plaintiffs’ asserted
 injuries are likewise too speculative to establish their standing to bring this suit.

representatives have Article III standing to challenge these standards before they are implemented by the states (and hence, before specific industries know for certain whether they will be subjected to new requirements as a result of a NAAQS). *See, e.g., Kennecott Copper Corp. v. EPA*, 462 F.2d 846 (D.C. Cir. 1972) (industry challenge to secondary NAAQS for sulfur oxides); *Lead Indus. Ass'n v. EPA*, 647 F.2d 1130 (D.C. Cir. 1980) (industry challenge to NAAQS for lead); *Am. Petroleum Inst. v. Costle*, 665 F.2d 1176 (D.C. Cir. 1981) (industry challenge to NAAQS for ozone); *Am. Trucking Ass'ns, Inc. v. EPA*, 175 F.3d 1027 (D.C. Cir. 1999), *rev'd on other grounds sub nom. Whitman v. Am. Trucking Ass'ns, Inc.*, 531 U.S. 457 (2001). Likewise, Proposed Defendant-Intervenors have a significant protectable interest in this case because the resulting review of the NAAQS could lead to the adoption of more stringent standards.

Indeed, a recent decision in the Ninth Circuit illustrates the importance of including industry representatives as intervenors to defend their interests in litigation and settlement agreements between federal agencies and environmental groups governing administrative rulemaking, rather than forcing industry to wait and participate only in any subsequent court-ordered rulemaking. *Conservation Nw. v. Sherman*, 715 F.3d 1181 (9th Cir. 2013). In *Conservation Northwest*, the district court approved a settlement agreement between the plaintiff environmental groups and the defendant federal agencies which required substantive amendments to the challenged rule without statutorily mandated public participation procedures. *Id.* at 1184-85 (district court found that because entry of consent decree was “a judicial act, not an agency act,” general statutory requirements applicable to rulemaking did not apply to actions required therein). The industry intervenor appealed, arguing that a court may not enter a consent decree that effectively amends agency rules without subjecting those changes to public participation procedures required by statute. *Id.* at 1185. The Ninth Circuit agreed with the industry intervenor and held that the lower court abused its discretion by approving a consent decree that “allows for substantial, permanent amendments” to agency rules without subjecting them to statutory procedures. *Id.* at 1189. Had the industry been denied intervention in that case, the district court’s abuse of discretion would not have been challenged by the parties to the

1 settlement agreement. Similarly, industry participation in the present case is imperative to
 2 ensure that any settlement between Plaintiffs and EPA does not impair Proposed Defendant-
 3 Intervenor's ability to protect their economic interests, particularly where the parties may revert
 4 to seeking a settlement that covers issues not properly before this Court.

5 **II. Proposed Defendant-Intervenor's Have a Procedural Interest in the Schedule**
 6 **for Review of the Ozone NAAQS That Is Not Adequately Represented by**
 7 **EPA.**

8 Proposed Defendant-Intervenor's have a significant protectable interest in any remedial
 9 order or settlement arising from this lawsuit establishing a timetable for EPA's review of the
 10 existing ozone NAAQS. The deadline requested by Plaintiffs directly threatens that interest: it
 11 would deprive Proposed Defendant-Intervenor's of a meaningful opportunity to ensure a
 12 rulemaking process that provides adequate time for interested parties to fully analyze EPA's
 13 proposal and develop relevant comments, and it would limit EPA's ability to fully review and
 14 respond to those comments. Notwithstanding the arguments of the other parties, EPA simply
 15 cannot represent Proposed Defendant-Intervenor's interests as regulated industries in this matter.
 16 *See, e.g., Natural Res. Def. Council v. Costle*, 561 F.2d 904, 912 (D.C. Cir. 1977) ("EPA is
 17 broadly concerned with implementation and enforcement of the settlement agreement," while
 18 regulated entities are "more narrowly focused on the proceedings that may affect their
 19 industries.").

20 **A. Proposed Defendant-Intervenor's Have a Significant Protectable**
 21 **Interest in Participating in Review of the Ozone NAAQS.**

22 As Plaintiffs acknowledge in their Response, the CAA provides Proposed Defendant-
 23 Intervenor's a legally protected right to participate meaningfully in the rulemaking process.
 24 Section 307 requires EPA to "ensure a *reasonable* period for public participation" in any
 25 rulemaking under the CAA. CAA § 307(h), 42 U.S.C. § 7607(h) (2013) (emphasis added).
 26 Plaintiffs assert this very interest themselves to demonstrate that they are harmed by EPA's
 27 inaction, stating that the Agency's failure to review the ozone NAAQS by the statutory deadline
 28 "deprive[s] Plaintiffs and their members of procedural rights and protections to which they
 would otherwise be entitled, including, but not limited to, the right to *comment on* . . . EPA

1 action retaining or revising” the NAAQS. Compl. ¶ 17 (emphasis added). Historically, the
2 regulated community has been among the most active participants in NAAQS rulemakings, *see*,
3 *e.g.*, Declaration of Howard J. Feldman in Support of Mot. to Intervene by Proposed Defendant
4 Intervenor ¶ 8 August 16, 2013, Doc. No. 11, and Proposed Defendant-Intervenor are already
5 participating extensively in EPA’s ongoing review of the ozone NAAQS, *see id.* ¶ 9.
6 Accordingly, EPA’s schedule for review of the NAAQS affects Proposed Defendant-
7 Intervenor’s statutorily recognized procedural interests just as strongly as it affects Plaintiffs’
8 interests.

9 Indeed, this Court has recognized the importance of the regulated community’s interest in
10 having adequate time to prepare and review data supporting EPA’s proposed rulemaking action
11 and to comment on that proposed action. In *Environmental Defense Fund v. Reilly*, this Court
12 granted industry intervenors’ motion to extend for one year rulemaking deadlines negotiated by
13 EPA and the Environmental Defense Fund to govern EPA’s promulgation of visibility protection
14 regulations over the objections of those parties. Order Granting Intervenor’s Mot. Re: Deadline
15 Extension, *Env’tl. Def. Fund, Inc. v. Reilly*, No. CV 82-6850 RPA (N.D. Cal. Jan. 9, 1990)
16 (attached hereto as Exhibit 1). This Court noted that the industry intervenors had shown good
17 cause to extend the rulemaking deadlines “so that Intervenor can conduct their own studies of
18 visibility impairment” and so that EPA could “more fully consider that Intervenor’s comments
19 on the proposal.” *Id.* at 1-2; *see also* 56 Fed. Reg. 5173, 5176 (Feb. 8, 1991) (noting effect of
20 industry intervenors’ request for more time).

21 The “reasonableness” of the period provided for public comment depends on the nature
22 and complexity of the CAA rulemaking in question. Review of a NAAQS is one of the most
23 complex rulemakings that EPA engages in, involving analysis of the most recent scientific
24 studies and literature, assessments of anticipated exposure to and risk from the pollutant in
25 question, and consideration of the Clean Air Scientific Advisory Committee’s (“CASAC”)
26 recommendations. See EPA, EPA 452/R-11-006, Integrated Review Plan for the Ozone
27 National Ambient Air Quality Standards at 2-2 Table 2-1 (Apr. 2011) (“Integrated Review
28 Plan”), *available at* http://www.epa.gov/ttn/naaqs/standards/ozone/s_o3_2008_pd.html (listing

1 necessary steps for review of ozone NAAQS). A timetable for EPA's review of the current
 2 ozone NAAQS that does not provide adequate time for Proposed Defendant-Intervenors to
 3 complete and submit their relevant studies or to otherwise comment fully on the various stages of
 4 the review process would harm Proposed Defendant-Intervenors' legally protected procedural
 5 interest in providing input on that review, just as foregoing that review altogether would deprive
 6 Plaintiffs of the same right.

7 In any settlement agreement resulting from this lawsuit, Plaintiffs and EPA will,
 8 as has been done in every case involving rulemaking deadlines, preserve the ability of the parties
 9 to extend the rulemaking schedule by stipulation or motion, in the event that the schedule proves
 10 to be unreasonable from the standpoint of any party. *See* Stipulated Modification of Consent
 11 Decree at 2, *Env'tl. Def. v. Johnson*, No. 03-01737 (RMU) (D.D.C. Apr. 15, 2005) (extending
 12 consent decree's deadlines so that EPA may "conduct additional technical analyses" in
 13 developing final rule required by settlement). In the interests of fairness and equity, Proposed
 14 Defendant-Intervenors should be granted leave to intervene so that they may be afforded the
 15 same opportunity to seek revision of any schedule that proves to be "unreasonable" from their
 16 standpoint.

17 Both Plaintiffs and EPA erroneously contend that Proposed Defendant-Intervenors assert
 18 an interest in extending the rulemaking process and causing additional delay. *See* Pls.' Resp. at 5
 19 (Proposed Defendant-Intervenors "have no protectable procedural right to extend a rulemaking
 20 process that is already delayed beyond statutory deadlines"); EPA's Resp. at 10 (Proposed
 21 Defendant-Intervenors "essentially are asserting that their interest is in having additional time
 22 past the statutory deadline"). Not so. Rather, Proposed Defendant-Intervenors merely seek
 23 intervention as of right in order to *preserve* their statutory role in the NAAQS review process to
 24 which they would have been entitled had EPA performed its review within the deadline. Public
 25 notice and comment are fundamental requirements for any agency action, and Congress
 26 recognized their importance by mandating that EPA "in promulgating *any* regulation under [the
 27 CAA], *including a regulation subject to a deadline*, shall ensure a *reasonable* period for public
 28 participation" CAA § 307(h), 42 U.S.C. 7607(h) (2013) (emphasis added). Thus, even

1 where time is of the essence, the CAA requires EPA to afford interested parties a meaningful
 2 opportunity to provide input on proposed actions. Proposed Defendant-Intervenors' procedural
 3 interest in participating in any NAAQS review rulemaking is not mooted by the fact that EPA's
 4 statutory deadline has already passed, and Proposed Defendant-Intervenors should not be barred
 5 from protecting that interest through intervention due to EPA's delay.

6 **B. EPA's Own Schedule for the NAAQS Review Demonstrates That**
 7 **Plaintiffs' Requested Relief Would Impair Proposed Defendant-**
 8 **Intervenors' Procedural Interest.**

9 EPA argues that the disposition of this suit will not impair Proposed Defendant-
 10 Intervenors' procedural interest because the possibility that this litigation will result in
 11 unreasonably short NAAQS rulemaking deadlines is merely "speculation." EPA's Resp. at 10.
 12 However, EPA's own schedule for its ongoing review of the ozone NAAQS demonstrates that
 13 Plaintiffs' requested deadline of September 30, 2014, is unreasonable and would inevitably
 14 impact Proposed Defendant-Intervenors' ability to participate in the rulemaking. In its
 15 Integrated Review Plan, EPA identified the numerous steps involved in its review of the ozone
 16 NAAQS and outlined the time frame necessary for completion of each step. Integrated Review
 17 Plan at 2-2 Table 2-1. According to the Integrated Review Plan, EPA requires at least nine
 18 months to take public comment on any proposed rule regarding the adequacy of the existing
 19 ozone NAAQS, review and respond to those comments, incorporate any relevant comments or
 20 new data into its final determination, and publish a final rule regarding the ozone NAAQS. *See*
 21 *id.* (scheduling "Proposed Rulemaking" for September 2013 and "Final Rulemaking" nine
 22 months later in June 2014).

23 Thus, if EPA were theoretically able to publish a proposed rule by December 2013,
 24 Plaintiffs' requested schedule might not impair Proposed Defendant-Intervenors' ability to
 25 adequately comment on that rulemaking. But EPA cannot publish a proposed rule by that date,
 26 as the Agency's own estimates demonstrate. Plaintiffs recently requested that this Court take
 27 judicial notice of an EPA memorandum regarding recent updates to EPA's schedule for review
 28

of the ozone NAAQS.² In that memorandum, EPA addresses the status of its second draft versions of the Risk and Exposure Assessments (“REAs”) and the Policy Assessment (“PA”), which are components of EPA’s NAAQS rulemaking that the Agency had originally scheduled for review by CASAC and the public by July 2012 and January 2013, respectively. *See* EPA Status Memo at 1; Integrated Review Plan at 2-2 Table 2-1 (“CASAC/Public Review of Second Draft REAs” and “CASAC/Public Review of Second Draft PA”). EPA now recognizes that “additional time is needed to complete these analyses,” and expects that the requisite period for CASAC and public review of these documents will not be complete until March 2014, putting EPA *fourteen to twenty months* behind schedule. *Compare* EPA Status Memo at 1, with Integrated Review Plan at 2-2 Table 2-1. Extrapolating this fourteen month delay to the remainder of EPA’s schedule for review of the ozone NAAQS shown in the Integrated Review Plan, EPA now could not publish a proposed rule before November 2014 at the earliest, with a final rule on the ozone NAAQS completed by August 2015. *See* Integrated Review Plan at 2-2, Table 2-1 (scheduling “Proposed Rulemaking” for September 2013 and “Final Rulemaking” for June 2014). Accordingly, Plaintiffs’ requested deadline of September 2014 for final action on review of the ozone NAAQS is wholly unreasonable and would necessarily require EPA to substantially shorten the time allotted for each stage of the review, including the period for public comment and EPA review of those comments that forms the basis of Proposed Defendant-Intervenors’ interest in this litigation.

C. EPA and Proposed Defendant-Intervenors Do Not Share a Common Ultimate Objective.

EPA will not adequately represent Proposed Defendant-Intervenors’ procedural interest in this case, just as Plaintiffs assert EPA will not represent their procedural interests. Plaintiffs and EPA fail to acknowledge that the required showing of inadequate representation is

² Pls.’ Req. for Judicial Notice Ex. A, Doc. No. 23 (Memorandum from Lydia Wegman, Dir., Office of Air Quality Planning & Standards, EPA, to Holly Stallworth, Designated Federal Officer, CASAC, EPA, regarding “Schedule for CASAC Review of the 2nd External Review Drafts of EPA’s Health and Welfare Risk and Exposure Assessments and Policy Assessment for the Review of the Ozone National Ambient Air Quality Standards” (undated) (“EPA Status Memo”)).

1 “minimal” and that Proposed Defendant-Intervenors need only demonstrate that their
 2 representation by current parties “*may be*” inadequate. *Arakaki v. Cayetano*, 324 F.3d 1078,
 3 1086 (9th Cir. 2003) (internal citation omitted) (emphasis added). Although the burden is higher
 4 where the proposed intervenor and an existing party share the same “ultimate objective,” *id.*,
 5 Proposed Defendant-Intervenors and EPA do not share a common ultimate objective in this case.

6 EPA’s ultimate objective in this litigation is to “defend its interest in obtaining a
 7 reasonable schedule” for its ongoing review of the ozone NAAQS. EPA’s Resp. at 12.
 8 Although Proposed Defendant-Intervenors also seek to ensure that any remedial order by this
 9 Court establishes a reasonable timetable for EPA’s review of the ozone NAAQS, the parties do
 10 not share a common objective regarding what time frame would be “reasonable.” While EPA
 11 very well may “vigorously defend *its* interest” in the rulemaking schedule, *id.* (emphasis added),
 12 Proposed Defendant-Intervenors’ specific protected interest in participating at certain stages of
 13 the rulemaking and presenting studies they have prepared is “more narrow and parochial” than
 14 the general public interest represented by EPA, *Californians for Safe & Competitive Dump Truck*
 15 *Transp. v. Mendonca*, 152 F.3d 1184, 1190 (9th Cir. 1998) (finding state agencies charged with
 16 administering prevailing wage law may not adequately represent union group’s interest in
 17 receiving prevailing wage in challenge to that law). Proposed Defendant-Intervenors’ ultimate
 18 objective is to secure a rulemaking schedule that allows adequate time for them to complete their
 19 scientific studies before EPA publishes a proposed rule and that provides a sufficient period for
 20 Proposed Defendant-Intervenors to review EPA’s proposal and submit relevant comments. EPA,
 21 on the other hand, is focused on the timeline for every stage of the rulemaking process, and may
 22 seek to extend some portions of the schedule that are relevant to EPA at the expense of periods
 23 that are important to Proposed Defendant-Intervenors, such as the public comment period.

24 EPA can no more represent the interests of Proposed Defendant-Intervenors than it can
 25 adequately represent the interests of Plaintiffs, who no doubt would also assert that their
 26 “ultimate objective” in this litigation is the adoption of what they view as a reasonable schedule
 27 for EPA’s review of the ozone NAAQS. *See* Pls.’ Resp. at 9 (“The only remedy that will be
 28 granted in this case is an order setting a rulemaking deadline.”). Indeed, should Plaintiffs

1 prevail, the ultimate objective of *every* party will be to ensure that the Court's remedial order
 2 provides a "reasonable" schedule for EPA's review. The distinguishing factor separating the
 3 ultimate objectives of Plaintiffs and Proposed Defendant-Intervenors from that of EPA is each
 4 party's specific interest in what constitutes a "reasonable" schedule. It is just as absurd to
 5 suggest that EPA will adequately represent the industry's interest in completing and submitting
 6 their studies as it would be to suggest that EPA adequately represents Plaintiffs' own interest in
 7 this litigation in more restrictive ozone NAAQS.

8 To the extent that this Court remains concerned that Proposed Defendant-Intervenors'
 9 interests overlap with those of EPA, Proposed Defendant-Intervenors would not object to
 10 participating in this case as intervenors on a limited basis to avoid any duplication of arguments
 11 or undue delay. Proposed Defendant-Intervenors would be willing to participate in any
 12 pleadings or briefing in this case on a staggered schedule, in which Proposed Defendant-
 13 Intervenors would file shortly after EPA and only address matters or arguments germane to their
 14 interests that are not adequately addressed by EPA. This format would allow Proposed
 15 Defendant-Intervenors to protect their unique interests while avoiding unnecessary duplication,
 16 and to the extent that EPA is able to fully represent Proposed Defendant-Intervenors' interests, it
 17 would place no additional burden on this Court.

18 **III. The CAA's Provisions Allowing Public Comment on EPA Settlements Will**
 19 **Not Sufficiently Protect Proposed Defendant-Intervenors' Interest In This**
 20 **Case.**

21 EPA suggests that Proposed Defendant-Intervenors' interest in the rulemaking schedule
 22 contained in any settlement that may result from this litigation is adequately protected by the
 23 provisions of CAA section 113(g) allowing for public comment on settlements to which the
 24 United States is a party. *See* EPA's Resp. at 11 n.7 (citing CAA § 113(g), 42 U.S.C. § 7413(g)
 25 (2013)). This is a hollow remedy. The section 113(g) comment process would not protect
 26 Proposed Defendant-Intervenors' interests as intervention as a party in this case would. That
 27 section merely allows members of the general public to "comment in writing" on a proposed
 28 settlement agreement and leaves EPA the discretion to withdraw or withhold consent to the
 settlement. CAA § 113(g), 42 U.S.C. § 7413(g) (2013). Proposed Defendant-Intervenors are

unaware of *any* case in which public participation through the section 113(g) comment process has led to the withdrawal or material revision of a proposed settlement agreement involving EPA. Moreover, section 113(g) would not provide commenters a role in any potential modifications to a settlement agreement once it is made final, depriving Proposed Defendant-Intervenors of input on any efforts by EPA to extend the agreed-upon deadlines. Therefore, the CAA's provisions regarding public comment on EPA settlement agreements do not adequately protect Proposed Defendant-Intervenors' interests.

IV. In the Alternative, This Court Should Grant Permissive Intervention.

Proposed Defendant-Intervenors satisfy all of the requirements for permissive intervention under Rule 24(b)(1)(B). *See* Mot. to Intervene at 18-21; *see also* Fed. R. Civ. P. 24(b)(1)(B). In the event that Proposed Defendant-Intervenors are not granted intervention as of right, this Court should grant permissive intervention in the alternative. Contrary to Plaintiffs' assertions, Proposed Defendant-Intervenors will bring no new "claims [that] are separate and apart from Plaintiffs' claims under these statutory provisions." Pls.' Resp. at 12. Proposed Defendant-Intervenors only seek to assert "defenses in support of EPA and against the relief Plaintiffs seek [that] will respond directly to Plaintiffs' claims" Mot. to Intervene at 19. Accordingly, Proposed Defendant-Intervenors are not required to show an independent basis for jurisdiction, and their defenses share common questions of law and fact with Plaintiffs' claims justifying permissive intervention. *See Ctr. for Biological Diversity v. Lubchenco*, No. 09-04087 EDL, 2010 WL 1038398, at *10 (N.D. Cal. Mar. 19, 2010) (granting permissive intervention in remedy phase of litigation).

CONCLUSION

For the foregoing reasons, the Court should enter an Order granting Proposed Defendant-Intervenors the status of Intervenors in support of Defendants in this case and ordering that Proposed Defendant-Intervenors' Proposed Answer to Complaint for Declaratory and Injunctive Relief be filed as of the date of that order.

RICHARD W. WILKING
CLERK
U. S. DISTRICT COURT
NO. DIST. OF CA, S.J.

UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF CALIFORNIA

ENVIRONMENTAL DEFENSE FUND,) CV 82-6850 RPA
INC., et al.,)
)
Plaintiffs,) ORDER GRANTING INTERVENORS'
) MOTION RE: DEADLINE
v.) EXTENSION
)
WILLIAM K. REILLY,)
Administrator of the United)
States Environmental)
Protection Agency,)
)
Defendant,)
)
ALABAMA POWER COMPANY, et al.;)
SALT RIVER PROJECT, et al.;)
et al.,)
)
Intervenors.)

IT IS HEREBY ORDERED:

1. Intervenors' Motion to Extend Deadlines for Rulemaking is hereby GRANTED.

2. Intervenors contend that the Environmental Protection Agency's (hereinafter the EPA) rulemaking deadlines should be extended so that Intervenors can conduct their own studies of

visibility impairment in the Grand Canyon. They assert that these studies would show that Intervenorors are not liable for the problem and that imposition of BART technology would be prohibitively costly and useless in addressing the visibility problem. Intervenorors also contend that additional time would allow the EPA to more fully consider that Intervenorors' comments on the proposal. Intervenorors further contend that the EPA has used the Court-imposed deadlines to avoid compliance with certain procedural laws.

3. The Supreme Court has stated that "[a]bsent constitutional constraints or extremely compelling circumstances the 'administrative agencies 'should be free to fashion their own rules of procedure and to pursue methods of inquiry capable of permitting them to discharge their multitudinous duties.'" [Cite omitted.]" Vt. Yankee Nuclear Power v. Natural Resources Defense Counsel, 435 U.S. 519, 543 (1978). The Court also stated that "for more than four decades [it has] emphasized that the formulation of procedures was basically to be left within the discretion of the agencies to which Congress had confided the responsibility for substantive judgments." Id. at 524.

4. The Clean Air Act (hereinafter the CAA) states that rulemaking procedures lie within the control and direction of the Administrator of the EPA and the CAA further directs the Administrator how to carry out his or her duties and responsibilities. 42 U.S.C. { 7607. The Code further states that "[t]he sole forum for challenging procedural determinations

made by the Administrator under this subsection shall be in the
1 United States court of appeals for the appropriate circuit . . .
2 at the time of the substantive review of the rule." 42 U.S.C. {
3 7607(d)(8).

4 5. Paragraph 6 of the Order approved in the present case by
5 this Court on April 20, 1984 states that the "time limits"
6 contained in the Order may be extended "by the Court" upon a
7 showing of good cause.

8 In the case at bar, Intervenorors argue that the final outcome
9 of the rulemaking will result in a \$1.6 billion dollar
10 expenditure by the Intervenorors. They argue that such an expense
11 is not justified in light of the minimal help it could render to
12 visibility concerns. The Court finds that the possible
13 expenditure of \$1.6 billion dollars constitutes a showing of good
14 cause for adjustment of the time limits. Such an enormous
15 expense would eventually be passed on to utility consumers for
16 years to come. This overwhelming possibility requires the Court
17 to extend the time limits of the Order.

18 Finally, the Court does not seek to impose its own decisions
19 upon the parties regarding the nature of the rulemaking. This
20 would be in direct contradiction to the Vermont Yankee case cited
21 above. The Court merely extends the period of time in which the
22 rulemaking may occur, and does not impose any particular decision

23 / / /

24 / / /

25 / / /

on the EPA. Additionally, the parties will have the opportunity
1 to raise their procedural claims to the Court of Appeals,
2 pursuant to the CAA. Therefore, this Court grants the
3 Intervenor's motion to extend the EPA's rulemaking deadlines.

4 6. The provisions of the amended stipulation approved by
5 Order of this Court on July 6, 1989, are hereby modified as
6 follows:

7 (1) Paragraph 4(m) is modified by changing "February 1,
8 1990" to "February 1, 1991."
9

10 (2) Paragraph 4(n) is modified by insertion in lieu
11 thereof the following paragraph:

12 "4(n) If a proposal is issued pursuant to Paragraph
13 4(m), provide that the comment period shall close by a
14 date not later than April 2, 1991, unless the
15 Administrator extends the comment period for good cause
16 shown;"
17

18 (3) Paragraph 4(o) is modified by insertion in lieu
19 thereof the following paragraph:

20 "4(o) If a proposal is issued pursuant to Paragraph
21 4(m), take final action on that proposal and on any
22 proposed identification under Paragraph 4(i) not later
23 than October 2, 1991, or, if later, 6 months after the

24 / / /

25 / / /

close of the comment period on the proposal made
pursuant to Paragraph 4(m) or the close of the record
under section 307(d)(5)(iv) of the Clean Air Act."

IT IS SO ORDERED.

DATED: Jan. 9, 1990

James M. Ideman
